BUILD philly NOW

MEMORANDUM

To Interested Parties
From Jon Geeting, Director of Policy and Advocacy, Build Philly Now
Date November 5, 2026
Re Priorities for Pennsylvania housing and zoning legislation in the 2027-28 session

2027-28 SESSION

Housing Bill Prioritization for the 2027-28 Session

With unified Democratic control of Harrisburg, the floodgates are about to open: many housing bills will move in 2027-28. This memo shows decision makers which housing supply reforms already have the most support, measured several ways: recorded votes, cosponsors, Republican backing and the Governor's own words. It then recommends where to start. Other groups will push their own bills too. This memo lays out the record behind ours.

139-62
House vote on statewide ADUs (HB 2186), June 2026. 38 Republicans voted yes.

21 of 26
Senators on record for ADUs (9 committee yes votes, 12 signed without a vote), against the 26 votes needed to pass the 50-member Senate

6
Supply concepts with a perfect policy score (45 of 45). All are rule changes with no state cost.

3
Concepts from the 2023-24 zoning omnibus (SB 1126) with no Senate bill: parking, lot size, manufactured homes

BOTTOM LINE

- **Lead with ADUs.** It pairs a perfect policy score with the highest readiness of any zoning concept. Merge HB 2186, SB 1346 (Senate ADU bill) and SB 1256 (ADUs) into one ADU-only bill in Title 53, so it reaches Philadelphia and Pittsburgh.
- **Six concepts earn a perfect policy score:** ADUs, occupancy, commercial-zone housing, parking, minimum lot size and manufactured homes. Transit-oriented development and missing middle follow at 43 of 45. Most have low readiness, so they need bills and champions.
- **Move one concept per bill.** Standalone bills pass more easily than an omnibus. SB 1126 (2023-24), backed by Sens. Rothman, Laughlin, Saval and Kearney, is the source for several concepts.
- **Fill the Senate gaps.** Parking, minimum lot size and manufactured homes have no Senate bill. Lot size and manufactured homes have no bill in either chamber.
- **Occupancy is next.** SB 1263 (occupancy limits) is a clean ban, and the House passed its companion 123-78.
- **Preservation is a separate track.** Tangled title, home repair and the historic tax credit have broad support but add few homes, and the last two need state money. They complement supply; they can't substitute for it.

1. The landscape

- **The House was never the problem.** HB 2186 (ADUs) passed 139-62 and HB 2109 (occupancy) 123-78. Both died in the Republican-controlled Senate Urban Affairs committee. Under unified control, these bills can get a Senate vote.
- **What passed the Senate got weaker to pass.** SB 1281 (pre-approved housing plans) went 50-0 only after an amendment required projects to comply with existing zoning. HB 2109 picked up an explicit five-person cap on unrelated housemates. The 2027-28 versions should return to the stronger texts.
- **The Governor's agenda points to statewide standards.** His budget address calls for a catalog of local zoning rules, and his Housing Action Plan proposes model ordinances and a "Housing-Ready" designation. Statewide standards deliver the same goals without asking DCED to review 2,560 municipalities one by one. He named "standards for accessory dwelling units," transit-oriented development, and mixed use on commercial corridors, and the plan names lot size, setbacks, manufactured homes, parking and occupancy (pp. 26, 32). The plan is silent on preemption; nothing in it argues against a statewide standard.
- **Coverage matters.** Bills that amend the Municipalities Planning Code skip Philadelphia and Pittsburgh. Each bill should be written into Title 53.

2. Supply concepts at a glance

One row per concept, scored on the concept at its best: the version BPN would write, not any one bill's current text. Each concept gets two scores. The **policy score** (effectiveness ×3, low admin burden ×2, Governor ×2, low fiscal cost ×2; maximum 45) measures what the policy would do. Fiscal cost is inverted like admin burden: 5 means no state cost, 1 means a large recurring appropriation or tax expenditure. **Readiness** is lawmaker support today (0-5: High 3.5+, Medium 1.5-3.5, Low below 1.5). The table is sorted by policy score. Each criterion is 0-5; ✓ marks a score of 4 or more. Transit-oriented development is scored as by-right density and no parking minimums near rail and frequent bus; permit-growth payments as a formula payment per new permitted unit per capita, from Census data. (The bill ranking in section 5 and the appendix scores actual bill texts and combines all five criteria, out of 60.)

Lot splits and a **housing bond** have no bill, vote or memo yet, so their readiness reads "No record." The Governor proposed a "$1 billion Critical Infrastructure Fund, supported by the issuing of bonds, that will go toward housing" (budget address); the plan's lot-size and subdivision language is related to lot splits (pp. 10, 32).

Concept	Effect.	Low admin	Gov.	Low cost	Policy score of 45	Readiness support, 0-5	Cost to the state	Introduced
ADUs	✓ 5	✓ 5	✓ 5	✓ 5	**45**	High 3.9	No state cost	Both
Occupancy limits (unrelated housemates)	✓ 5	✓ 5	✓ 5	✓ 5	**45**	Medium 3.1	No state cost	Both
Housing by right in commercial zones	✓ 5	✓ 5	✓ 5	✓ 5	**45**	Low 0.8	No state cost	Both
Parking minimums	✓ 5	✓ 5	✓ 5	✓ 5	**45**	Low 0.4	No state cost	House only
Minimum lot size cap (+ setbacks, height)	✓ 5	✓ 5	✓ 5	✓ 5	**45**	Low 0.2	No state cost	Neither
Manufactured homes in single-family zones	✓ 5	✓ 5	✓ 5	✓ 5	**45**	Low 0.2	No state cost	Neither
Duplexes to fourplexes (missing middle)	✓ 5	✓ 5	✓ 4	✓ 5	**43**	Low 0.9	No state cost	House only
Transit-oriented development	✓ 5	✓ 4	✓ 5	✓ 5	**43**	Low 0.1	No state cost	Neither
Lot splits	✓ 5	✓ 5	3	✓ 5	**41**	No record	No state cost	Neither
Objective design standards / staff approval	✓ 4	✓ 5	✓ 4	✓ 5	**40**	Low 0.2	No state cost	Neither
State-agency permit shot clock	✓ 4	3	✓ 4	✓ 4	**34**	Medium 2.5	Agency process changes	Senate only
Permit-growth payments to municipalities	✓ 4	✓ 5	✓ 4	2	**34**	Low 1.1	State funding (formula payments)	Both
Single-stair buildings	✓ 4	3	3	✓ 5	**34**	Low 0.9	No state cost	Senate only
Housing bond	✓ 4	3	✓ 5	2	**32**	No record	State borrowing (loans repaid; grants not)	Neither
Mall/greyfield redevelopment tax abatement	2	✓ 4	✓ 4	✓ 4	**30**	High 4.6	Local tax revenue (opt-in)	House only
LERTA abatement for housing	2	✓ 4	3	✓ 4	**28**	High 4.6	Local tax revenue (opt-in)	Senate only
RACP money for housing	2	3	✓ 5	3	**28**	Low 1.0	State bond funds	Both
Enforcement of state housing standards	n/a	n/a	n/a	n/a	not scored	Low 0.0	Depends on design	Neither

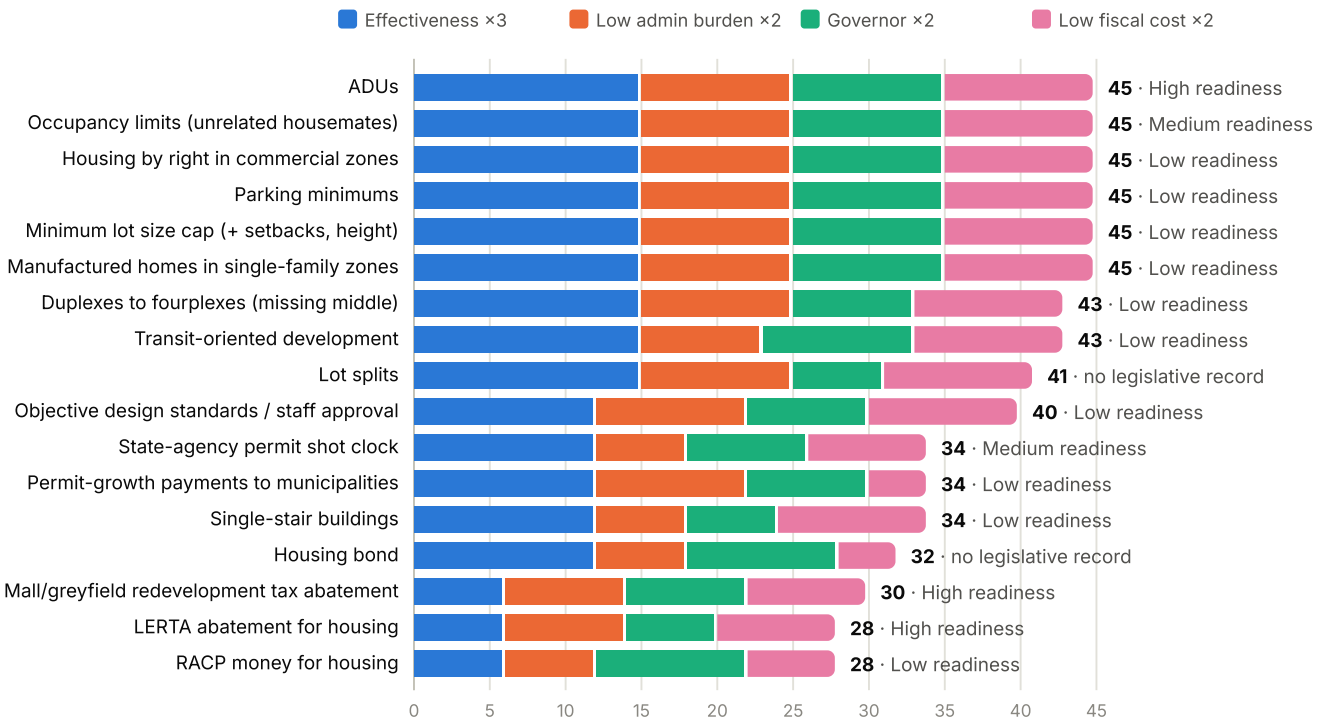

Figure 1. Policy score by concept, with readiness. Segment length is the weighted points from effectiveness, admin, Governor alignment and fiscal cost. Readiness (lawmaker support today) is noted at the end of each bar. The highest-scoring policies, including TOD, missing middle, lot size and manufactured homes, have low readiness: they need new bills and champions. The tax abatements are the reverse: high readiness, weaker mechanisms, and they cost local tax revenue. Permit-growth payments lose points for needing a state appropriation. Preservation concepts appear separately in section 7.

3. Where support already is

Every supply concept on one page, with each kind of support side by side. Counts are **current** legislators, on any bill that carries the concept, excluding members not returning in 2027 (unofficial November results). "Voted" is each member's most recent committee or floor vote; "signed only" means a cosponsor or memo signer with no recorded vote. Republicans on record counts yes votes and signatures in both chambers. Readiness (0-5) weighs a yes vote fully and a signature half, against the votes needed to pass. Sorted by readiness.

Concept	House voted yes–no	House signed only	Senate voted yes–no	Senate signed only	Republicans on record	Passed a chamber 2025-26	Governor	Readiness 0-5
Mall/greyfield redevelopment tax abatement*	94–81	1	23–1	2	16	—	Plan goal	High 4.6
LERTA abatement for housing*	94–81	1	23–1	2	16	—	Related	High 4.6
ADUs	137–60	0	9–0	12	45	House 139-62	Named	High 3.9
Occupancy limits (unrelated housemates)	120–77	0	0–0	12	37	House 123-78	Named	Medium 3.1
State-agency permit shot clock	0–0	0	27–19	0	23	Senate 30-20	Plan goal	Medium 2.5
Permit-growth payments to municipalities	0–0	14	8–1	3	6	—	Plan goal	Low 1.1
RACP money for housing	14–12	14	0–0	10	1	—	Named	Low 1.0
Duplexes to fourplexes (missing middle)	13–12	24	0–0	5	4	—	Plan goal	Low 0.9
Single-stair buildings	0–0	18	0–0	14	3	—	Related	Low 0.9
Housing by right in commercial zones	14–11	29	0–0	3	2	—	Named	Low 0.8
Parking minimums	0–0	11	0–0	5	4	—	Named	Low 0.4
Minimum lot size cap (+ setbacks, height)	0–0	0	0–0	5	3	—	Named	Low 0.2
Manufactured homes in single-family zones	0–0	0	0–0	5	3	—	Named	Low 0.2
Objective design standards / staff approval	0–0	19	0–0	0	0	—	Plan goal	Low 0.2
Transit-oriented development	0–0	7	0–0	0	0	—	Named	Low 0.1
Lot splits	No bill, vote or memo yet					—	Related	No record
Housing bond	No bill, vote or memo yet					—	Named	No record

* The two tax abatements share one support count: HB 1446 (malls and greyfields) drew the House votes and SB 1277 (LERTA) the Senate votes. Governor: "Named" means the budget address or plan names the concept; "Plan goal" means the plan states the goal without naming the tool; "Related" means adjacent language only.

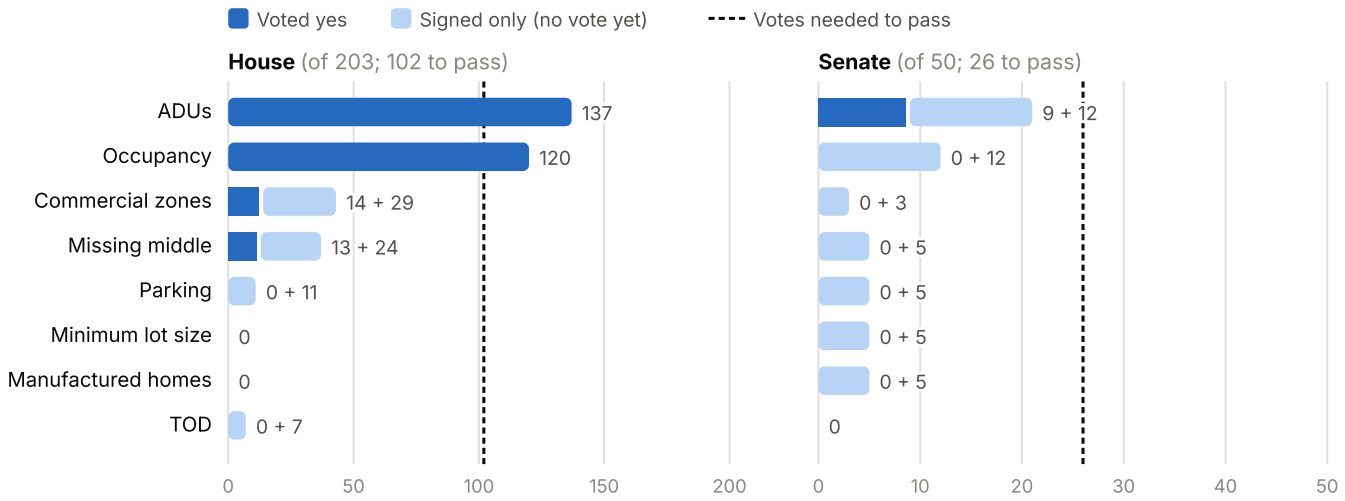

Figure 2. Legislators on record, by chamber, against the votes needed to pass. The House has voted on ADUs and occupancy. In the Senate, only ADUs come close to 26 (9 yes votes + 12 signatures), and none of the SB 1126 concepts has a single recorded Senate vote.

Bipartisan Senate support for the SB 1126 concepts

Senator	ADUs	Missing middle	Parking	Lot size	Mfd. homes	Occupancy	Commercial
Greg Rothman (R-34)	○ Prime	○ Memo	○ Memo	○ Memo	○ Memo	—	—
Daniel Laughlin (R-49)	○ Memo	○ Memo	○ Memo	○ Memo	○ Memo	—	—
Nikil Saval (D-1)	●	○ Cosp.	○ Cosp.	○ Cosp.	○ Cosp.	○ Prime	○ Cosp.
Timothy Kearney (D-26)	○ Memo	○ Cosp.	○ Cosp.	○ Cosp.	○ Cosp.	○ Cosp.	—

● voted yes on a bill in this area · ○ signed (prime sponsor, memo co-author or cosponsor) without a vote · — no record. Source: palegis.us bill pages, memos and roll calls.

All four have signed the ADU, missing-middle, parking, lot-size and manufactured-home concepts through SB 1126. None has yet voted on any of them except ADUs (Saval, in committee). Their record makes them well placed to carry standalone Senate bills on these concepts. Sens. Vogel and Argall (R) are also on record on ADUs, commercial conversion and single-stair.

4. Where the supply bills are

Concept	House	House bill	Senate	Senate bill
ADUs	● ● ●	HB 2186 · Rep. Inglis (D)	● ● ○	SB 1346 · Sen. Rothman (R) SB 1256 · Sen. Collett (D)

Figure 3. Furthest step reached in 2025-26, by chamber. Dots: introduced · committee vote · passed the chamber. Bills are listed with their prime sponsor and party. Concepts in red have no bill in either chamber.

5. The ranked supply bills (Tier 1)

#	Bill	What it does	Furthest stage	Support	Score
1	HB 2186 John Inglis III (D-38)	Accessory Dwelling Units	Passed House; died in Senate Urban Affairs & Housing	3.9	**56.7**
1	SB 1256 Maria Collett (D-12)	Accessory Dwelling Units (Collett)	Referred to Senate Urban Affairs & Housing; no action	3.9	**56.7**
3	SB 1263 Nikil Saval (D-1)	Municipal Occupancy Reform (Golden Girls Law, Senate)	Referred to Senate Urban Affairs & Housing; no action	3.1	**54.3**
4	SB 1346 Greg Rothman (R-34)	Accessory Dwelling Units (Senate)	Reported from Senate Urban Affairs & Housing; first consideration	3.9	**53.7**
5	HB 2109 Tarik Khan (D-194)	Occupancy Reform (Golden Girls Law)	Passed House; died in Senate Urban Affairs & Housing	3.1	**48.3**
6	SB 1239 Jarrett Coleman (R-16)	Residential in Commercial Zones	Referred to Senate Local Government; no action	0.8	**47.4**
7	HB 2155 Greg Scott (D-54)	Parking Flexibility	Referred to House H&CD; no action	0.4	**46.2**
8	HB 1446 Joshua Siegel (D-22)	Redevelopment of Malls, Greyfields and Brownfields (tax abatement)	Reported from House Local Government and Rules; laid on table (Rule 71)	4.6	**43.8**
9	HB 1459 Joshua Siegel (D-22)	Multi-Family Housing in Commercial Zones	Referred to House Local Government; no action	0.8	**42.4**
10	SB 1277 Patrick Stefano (R-32)	Property Tax Abatement for Housing Redevelopment	Passed Senate second consideration; re-referred to Rules	4.6	**41.8**

Full supply ranking in Appendix A; preservation bills are ranked separately in Appendix B. Scores update automatically from the data files.

6. Recommended approach: one concept per bill

WAVE 1 · VOTES ON RECORD

Move first

ADU bill (HB 2186 + SB 1346 + SB 1256, Title 53) · Occupancy (SB 1263 text)

WAVE 2 · STRONG TEXT, NEEDS SUPPORT

Build support

Parking (HB 2155) · Commercial zones (SB 1239 substance in Title 53) · Missing middle (HB 2185)

WAVE 3 · NEW BILLS

Introduce

Senate parking bill · Minimum lot size · Manufactured homes · Single-stair · Transit-oriented development · Enforcement

The Governor's "modernize the Municipalities Planning Code" language becomes the umbrella message for the package, not a single bill.

Bills that still need to be introduced

Concept	House	Senate	Draft from	Plan cite
Parking reform	HB 2155 (Scott)	None	HB 2155's one-sentence ban on parking minimums; SB 1126 caps as a fallback	p. 32
Minimum lot size (+ setbacks, height)	None	None	SB 1126 s. 603(p): no minimum over 1,400 sq ft, setbacks ≤4 ft, height floor of 4 stories where water and sewer exist	p. 32
Manufactured homes	None	None	SB 1126 s. 603(m): by right where single-family homes are allowed, not confined to parks	p. 32
Missing middle	HB 2185 (Inglis)	None	HB 2185, with the proof-of-concurrency clause narrowed	p. 32
Enforcement of state housing standards	None	None	Design open; options include county and DCED review, Attorney General authority and a private right of action (see below)	p. 31
Single-stair buildings	None	SR 348 (study only)	A statute requiring the building code to allow single-exit stairways up to six stories, with sprinklers and other fire-safety conditions, by a set date	p. 31
Transit-oriented development	Memo 47776 only	None	New text: by-right density, no parking minimums near rail and frequent bus	Budget address
Lot splits	None	None	New text: by-right split of a single-family lot into two, ministerial approval, each lot buildable	pp. 10, 32 (related; not named)
Housing bond	None	None	A state bond for a mixed-income revolving loan fund and home repair; the Governor's $1B bond-backed fund is the starting point (see below)	Budget address; p. 20

The manufactured-home community rights bills, SB 1446 (Santarsiero) and HB 2098 (Ciresi), "provide for manufactured homes" but rewrite tenant rights in manufactured-home communities. They contain no zoning provisions.

Funding: a housing bond

The Governor proposed "a new $1 billion Critical Infrastructure Fund, supported by the issuing of bonds, that will go toward housing" (budget address). His plan says the fund should use "a combination of grants, low-interest loans, and loan guarantees" and support "middle market housing development" (p. 20). Borrowing costs have risen since, which makes any bond more expensive. A bond is still the most direct way to pay for the parts of the agenda that need money. BPN would put the proceeds toward two uses:

- **A revolving loan fund for mixed-income housing,** modeled on Montgomery County, Maryland's $100 million Housing Production Fund. It makes five-year construction loans to mixed-income projects with at least 30% of units income-restricted, then relends the money as it is repaid (HOC, NACo).
- **Home repair** (HB 1650/SB 876), which has gone three budgets without state money (Capital-Star).

The bond and the zoning bills reinforce each other: by-right rules lower what each project costs, and the fund pays for more of them.

Who enforces? An open design question

A statewide standard is only as strong as its enforcement. Today the main enforcer is the applicant who gets denied: validity challenges, curative amendments and deemed-approval suits are slow, paid for by

the applicant, and award no attorney's fees. Enforcement should be settled alongside the standards themselves. The specific choices lawmakers make will determine how much it asks of the state, so we do not score it yet.

Options under discussion, which could be combined:

- **County planning commissions** flagging noncompliance in the zoning reviews they already conduct.
- **DCED review** of municipalities, ideally triggered by complaints rather than routine audits.
- **Attorney General authority** to sue noncompliant municipalities. Pennsylvania has a precedent in the ACRE law for local agricultural ordinances (Act 38 of 2005).
- **A private right of action** for applicants and residents, with attorney's fees.
- **Loss of discretionary state grant eligibility** for noncompliant municipalities.

One principle holds regardless of the details: **complaint-driven enforcement asks far less of the state than audit-driven verification.**

	Audit-driven verification REDD grants, Housing-Ready designation, zoning catalog	**Complaint-driven enforcement**
Who does the work	The state reviews every participating municipality and confirms follow-through	The state acts when someone complains
Workload grows with	The number of municipalities (up to 2,560)	The number of disputes
If the state is slow	Nothing changes; the incentive is simply not paid	The statewide standard still applies

7. Preservation track: separate from supply

COMPLEMENTS SUPPLY REFORM; DOESN'T REPLACE IT

These bills keep existing homes and buildings livable, owned and in use. They have some of the broadest support in the legislature, but they add few or no new homes. Home repair and a larger historic credit also need state money, while most of the supply agenda costs the state nothing. Passing these instead of the supply bills would leave the shortage where it is.

Concept	Effect.	Low admin	Gov.	Low cost	Policy score of 45	Readiness support, 0-5	Cost to the state	Introduced
Transfer-on-death deeds (tangled title)	2	✓ 5	✓ 5	✓ 5	**36**	High 3.9	No state cost	Both
Heirs-property partition protections (tangled title)	2	✓ 4	✓ 4	✓ 5	**32**	High 3.9	Court process	Both
Small-estate home affidavit (tangled title)	3	3	✓ 4	✓ 4	**31**	High 3.9	County and court process	Both
Historic preservation tax credit expansion	3	✓ 4	3	1	**25**	Medium 3.4	State tax expenditure (program cap now $20M a year)	Both
Home repair grants (Whole-Home Repairs successor)	2	2	✓ 5	1	**22**	Medium 3.4	Annual state appropriation (budget line exists, unfunded)	Both

Concept	House	House bill	Senate	Senate bill
Transfer-on-death deeds	●●●	HB 2124 · Rep. Briggs (D)	●●○	SB 890 · Sen. Bartolotta (R)
Heirs-property protections	●●●	HB 1498 · Rep. Rabb (D)	●●○	SB 890 · Sen. Bartolotta (R)
Small-estate home affidavit	●○○	HB 2172 · Rep. Scott (D)	●○○	SB 1203 · Sen. Malone (D)
Home repair grants	●●●	HB 1650 · Rep. Powell (D)	●○○	SB 876 · Sen. Argall (R)
Historic tax credit	●●●	HB 1572 · Rep. Goughnour (D)	●○○	SB 1356 · Sen. Flynn (D) SB 1394 · Sen. Farry (R)

Figure 4. Preservation bills: furthest step reached in 2025-26. Dots: introduced · committee vote · passed the chamber.

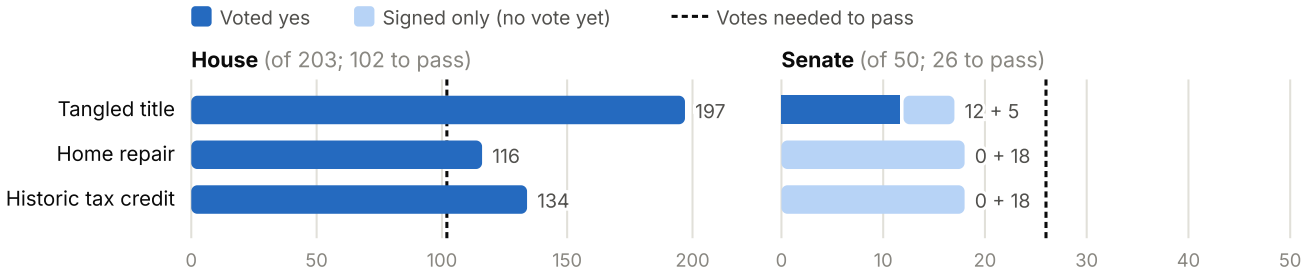

Figure 5. Legislators on record for preservation, by chamber. All three have passed the House. In the Senate, 12 senators voted for SB 890 (heirs property and transfer-on-death deeds) in committee; home repair has 18 Senate signers and the historic credit 18, with no Senate votes yet on either.

- **Tangled title.** The plan counts about 35,000 heirs' properties statewide and over 10,000 tangled titles in Philadelphia, and names "transfer-on-death deeds for primary residences" (pp. 15, 24). HB 2124 (transfer-on-death deeds) passed the House 202-0. SB 890 (Bartolotta, R) cleared Senate Judiciary 14-0. No state cost beyond court and county process.
- **Home repair.** HB 1650 (Home Preservation Grant Program) passed the House 122-80. It would succeed the 2022 Whole-Home Repairs program, which passed with bipartisan support and $125 million in one-time federal aid; 3,965 of about 17,000 applicants got help (Capital-Star). The plan quotes roundtable participants calling Whole-Home Repairs "key to maintaining our naturally occurring affordable housing" and counts 16,500 units on repair waitlists (pp. 11-12). Republicans have since pulled their support. In 2024 the money stalled after the Governor signed the budget, with Senate Republicans saying it needed enabling legislation (WHYY). The 2025-26 budget left it out, the third year without a state-funded successor (Capital-Star). House Republicans voted 20-80 on HB 1650. The Senate version, SB 876, is co-authored by Sens. Argall (R) and Saval (D). The plan calls for a "state-sponsored home preservation fund" (p. 21). **It needs an annual appropriation.**
- **Historic preservation tax credit.** The credit pays for rehabilitating historic buildings, including conversions to housing. Current law caps it at $20 million a year statewide and $500,000 per taxpayer. HB 1572 (Goughnour, D) passed the House 141-62 (D 102-0, R 39-62). It and the Senate bills, SB 1356 (Flynn, D) and SB 1394 (Farry, R), would raise only the per-taxpayer cap, to $1.5 million (bill text). None raises the $20 million program cap. Peer states go much further: Kentucky's cap rose from $5 million to $100 million a year (Novogradac), and Ohio's base cap was $60 million, temporarily doubled to $120 million for 2023-24 (Vorys, 2022). BPN's version would remove the per-project cap or raise it sharply and lift the program cap toward those levels. It is a tax expenditure, so it scores 1 of 5

on fiscal cost. The plan supports state money for conversions and upper-floor rehab (p. 20) but does not name the credit.

8. Recommended changes to bill text

1. **Every by-right bill:** add SB 1256's clause making noncompliant local ordinances void by a date, with the state standard applying meanwhile.
2. **ADUs:** keep the 14-day deemed approval and utility-fee shield; reject "subject to reasonable regulation."
3. **Occupancy:** use SB 1263's clean ban; drop HB 2109's five-person authorization and student carve-out.
4. **Missing middle:** narrow HB 2185's proof-of-concurrency clause.
5. **Commercial zones:** drop the growing-county test in HB 1459 (housing in commercial zones) and add the density, lot-size and setback waivers from SB 1239.
6. **Grants:** replace application-based grants (SB 1278/HB 2423) with a formula payment per new permitted unit per capita, from Census Building Permits Survey data.
7. **Small-estate affidavit:** make SB 1203/HB 2172 (small-estate home affidavit) mandatory statewide, not a county opt-in.
8. **Single-stair:** turn SR 348 (single-stair study) from a study into a statutory directive with a deadline.

9. Recommendations

1. **Pass a single statewide ADU bill early in the session,** combining the House-passed HB 2186 with the Senate's 14-day deemed-approval process.
2. **Move occupancy reform (SB 1263) early.**
3. **Introduce standalone Senate bills on parking, minimum lot size and manufactured homes,** building on the SB 1126 coalition, and House bills on lot size and manufactured homes.
4. **Advance parking (HB 2155), commercial-zone housing (SB 1239 in Title 53) and missing middle (HB 2185)** as standalone bills.
5. **Settle enforcement alongside the standards,** favoring complaint-driven review over state audits of 2,560 municipalities.
6. **Introduce a transit-oriented development bill** to match the Governor's call in the budget address.
7. **Pursue a housing bond** for a mixed-income revolving loan fund (the Montgomery County, Maryland model) and home repair, building on the Governor's $1 billion bond-backed fund.
8. **Legalize single-stair apartment buildings up to six stories by statute,** building on the 14 senators who signed SR 348, rather than waiting on a study.
9. **On the separate preservation track, pass tangled-title reform (SB 890), fund home repair (HB 1650/SB 876) and expand the historic tax credit's program cap, not just its per-project cap,** alongside, not instead of, the supply bills.
10. **Release the Municipalities Planning Code study (SR 211).** Its scope covers single-family zoning, lot sizes, setbacks and missing middle, and it was due in October 2026.

Method and caveats

- **Data:** bill text, sponsors, cosponsors, histories and roll calls from palegis.us (fetched Nov 5, 2026); member-level votes from the PA Housing Votes tracker plus palegis roll calls; Governor statements from the budget address and Housing Action Plan (printed page numbers).
- **Scoring:** effectiveness rewards self-executing statewide standards; admin burden and fiscal cost are inverted (5 = no agency capacity needed; 5 = no state cost), and a bill scoring 0-1 on admin cannot rank above Tier 3. Fiscal cost: 4 = administrative cost only or opt-in local revenue, 3 = redirects existing state money, 2 = new sizable spending, 1 = large recurring appropriation or tax expenditure. Lawmaker support is computed, not judged. Concepts are reported as a policy score and readiness; bills as one combined score. Supply and preservation are scored the same way but ranked separately. We do not score housing units unlocked, because no estimates exist.
- **Caveats:** November 2026 results were unofficial at the time of writing; counts exclude members not returning in 2027, and new members have no record yet. Preservation bills score low on effectiveness by design.

Appendix A: ranked supply bills

E effectiveness ×3 · A low admin burden ×2 · G Governor ×2 · C low fiscal cost ×2 · S lawmaker support ×3; score out of 60. † Capped at Tier 3 because its admin score is 0-1. SB 1126 (2023-24 zoning omnibus) is the concept source, not a vehicle, and SR 211 (MPC study) is already adopted; neither is ranked.

#	Bill	Title	Prime sponsor	Tier	E	A	G	C	S	Score
